

Easee receives a Module B certification for Charge Core

The safety of our products is of the utmost importance to us. When we launched the Charge Lite last year, we went the extra mile and obtained the Module B certification as an additional layer of confidence that our products are safe and compliant.

We are pleased to inform all our valued partners that we have received the Module B certification for Charge Core as well.

The Module B certification is not standard practice in the EV charger industry, and it ensures that independent experts verify the technical solution and documentation are compliant with all relevant European requirements.

Thank you all for your continued support.

Best,

Easee
